It’s possible for you to access your personal archives directly through your GroupWise 2012 Client. When this functionality is enabled by your IT administrator, you’ll be able to view GroupWise WebAccess and your Netmail Archive WebViewer archives directly in your GroupWise Client. As such, you’ll no longer have to navigate away from your GroupWise Client and/or remember the GroupWise WebAccess URL.

How to Access Your Archives
After GroupWise 2012 has been configured and deployed by the system administrator, you’ll be able to launch GroupWise WebAccess directly in your GroupWise Client. From GroupWise WebAccess, you can then easily link to your archives in Netmail Archive WebViewer.

1. Click the Home View link your GroupWise Client.

2. When prompted, enter your GroupWise user credentials, and click Login to log in to GroupWise WebAccess.

3. Once you have entered your user credentials, GroupWise WebAccess is launched in your GroupWise Client. You can then click the Archive link to open Netmail Archive WebViewer directly in your GroupWise Client.

Your Netmail Archive WebViewer archives are now displayed directly in your GroupWise Client.

To return to your inbox and view your mail, simply click the Mailbox link in the GroupWise Client.
